

New! SimplifiApp

Simplifi Networks has created a tool to help make it easier to configure your Mikrotik routers. This software only works on Mikrotik routers purchased from Simplifi Networks or one of the Simplifi Networks resellers.

A simple click based tool for configuring Mikrotik routers.

Features include:

- Blocking websites like Facebook, Twitter etc
- Limiting number of connections for clients
- Limiting bandwidth

How to use it

- Download the Simplifiapp executable, install it on your Windows PC
- Connect the Internet to port 1 of the Mikrotik router
- Connect the PC to any of the other ports, IP address will be provided by the Mikrotik or set your computer to 192.168.88.x
- Enter the default Mikrotik IP address **192.168.88.1**, the username is **admin** and the password is blank.
- The app will verify that you purchased your device from Simplifi Networks, open the dashboard and you're are good to go!!!

Mikrotik Router Config Tool

Search for something... Log out

Welcome. Login has been successful Your Device Is Supported.
